Subject: Additional Information Request for the Saluda Hydroelectric Project

Dear Mr. Ammarell:

We are currently reviewing the license application filed on August 28, 2008, along with subsequent information filed through the present, for the Saluda Hydroelectric Project (project). We have determined that additional information is needed to complete our evaluation of the license application for the project. Please provide the information requested in Schedule A within 30 days from the date of this letter pursuant to section 4.32(g) of the Commission's regulations. If the requested information causes any other part of the application to be inaccurate, that part must also be revised and refiled by the due date.

The Commission strongly encourages electronic filing. Please file the requested information using the Commission's eFiling system at <https://ferconline.ferc.gov/FERCOOnline.aspx>. For assistance, please contact FERC Online Support at FERCOOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, a paper copy may be submitted. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include docket number P-516-459.

If you have any questions, please contact Colleen Corballis at colleen.corballis@ferc.gov or at (202) 502-8598.

Sincerely,

Janet Hutzal, Chief
Midwest Branch
Division of Hydropower Licensing

Enclosure: Schedule A

SCHEDULE A

REQUEST FOR ADDITIONAL INFORMATION

Exhibit D

1. Section 5.0 of Exhibit D, filed on March 13, 2020, states the dependable capacity of the Saluda Hydroelectric Project (project) is 200 megawatts. Because the reservoir is large and not part of a federally regulated river, calculating dependable capacity based on U.S. Geological Survey gage readings are inaccurate. Staff needs an accurate dependable capacity to calculate the project's economics. Therefore, because staff does not have the data needed to accurately calculate the dependable capacity, please provide the updated dependable capacity value in 2025 dollars and reasoning on how the value is calculated.
2. Section 8.0 of Exhibit D filed on March 13, 2020 provides values of on-peak and off-peak power; however, staff needs updated values to calculate the project's economics. Therefore, please provide updated values of on-peak and off-peak power in dollars per megawatt-hours in 2025 dollars.
