Subject: Dominion Energy South Carolina, Inc.  
Saluda Hydroelectric Project P-516, NATDAM No. SC00224  
Notification of Unit 2 Dewatering and Scroll Case Drainpipe Replacement

Dear Mr. Brown:

As required by 18 CFR §12.11, Dominion Energy South Carolina, Inc. (DESC) hereby notifies you of DESC's intention to dewater the scroll case and partially dewater the Unit 2 penstock to facilitate replacement of the scroll case drainpipe. This replacement does not constitute a dam safety risk and is considered a routine maintenance item. The penstock will be dewatered to approximately 50% via closed headgate to seal the penstock intake. A pump will be placed in the scroll case to displace any sitting water and leakage. Neither the dewatering process nor drainpipe replacement will involve any modification to the dam or powerhouse structure.

DESC anticipates lowering the head gates and placing the scroll case pump to begin the dewatering on April 6, 2026. The drainpipe replacement is planned to be performed when the scroll case is dewatered, around April 8, 2026. Plant staff will verify that the scroll case is dewatered prior to beginning work. The drainpipe replacement is anticipated to be completed by April 12, 2026. The dewatering will follow previously executed procedures that have previously been coordinated. CEII Attachment 1 contains the Saluda Hydro Dewatering Procedure.

Plant staff at Saluda Hydro is in the process of evaluating available resources and may reschedule this dewatering and repair to a later outage. DESC will notify the FERC ARO should this planned work be postponed past the above dates.

If you have questions regarding this submittal, please contact the undersigned at 803-217-7322 or [raymond.ammarell@dominionenergy.com](mailto:raymond.ammarell@dominionenergy.com).

Sincerely,

A handwritten signature in blue ink that reads "Raymond R. Ammarell".

Raymond R. Ammarell, P.E., Manager  
Dam Safety and Hydro Compliance  
Chief Dam Safety Engineer (South Carolina)
